turn out RIGHT

IT'S THE QUICK, EASY, SURE WAY NO WORRY ...

NO GUESSWORK!

When pectin is used in making jam and jelly, the Wartime Prices and Trade Board Order No. 150 Wartine Prices and Trade Board Order No. 150 allows you to use ustar not in excess of one and one-quarter pounds of sugar for each pound of fruit. On the basis that "fruit" means "unpre-pared," fruit, his allows you to mike your juns and jellies the Certo way which gives you approximately two-hirds more jam or jelly from the same amount of fruit.

SHORT BOIL—For jam you need give only a one-minute to two-minute full, rolling boil—for jellies only a half-minute to a minute.

THRIFIY—As practically no juice has time to boil away you get up to two-thirds more jam or jelly from the same amount of fruit. NATURAL TASTE—The boil is so short it cannot affect the fresh, natural taste or darken the color. or darken the color.

SURE RESULTS — Follow exactly the
tested recipes given with Certo and
you'll have lovely jams and jellics.

HELP WIN THE WAR!

The Bay of Quinte Insurance Co. Offers A Practical Suggestion

NOW is the time when the greatest danger of barn fires exists, as a result of spontaneous combustion arising from partially-cured or green hay, stored in barns. Fires arising from such a self-lignited cause can destroy your crop and building.

PLAY SAFE — Use plenty of salt on each load as it goes into the mow. This is a proven method of assisting in prevention of fires caused from spontaneous combustion.

A nice little dash of realism is provided during battle exercises at Camp Borden as a detachment of armored vehicles is strated by speedy signaff.

These armored cars, almost as sturdy as baby tanks, pack a lot of firepower. If the plane were really hostile, Bren guis might give pilot nasty surprise.

What's a little water, eh mate? Soaked to the hide, a soldier at Petawawa Camp extracts a cigarette from one of the waterproof corners of his kit and takes a light from one of his buddies. It's robust training and the boys like it.

EACH WORK DAY FOR THE YOUNG WOMEN OF THE RCAF COMMENENCES AT "8.30 A.M"

Immediate Adoption

Of Conscription Urged in Resolution

Call it reveille or call it 0630 hours, air force time, it's still 6.30 a.m.; and that's when an airwoman's day begins. Because the night has seemed so short she checks with her clock- a formality. But there's much to be done-time to be stirring.

Breakfast is substantial at air force stations, where the day's work starts early. Careal, toast with bacon and eggs sends this girl off to a good start. New rations add fruit juice and more milk to the menus, served in cafeteria style in the mess.

At her deak, this airwoman is taking the place of an airman. In doing 20, she is fulfilling the purpose of the woman's Division by releasing manpower for action.

story primarily concerns one woman, it speaks also for the themsands of others who are serving their country well by releasing men to handle the guns. Women in air force blue: They march along proudly, knowing that they are doing a very real job in the big struggle to overthrow our enemies. Although our

Airwomen don't fly. Their job is strictly "groun stuff". But turn the conversation skyward and yo will always find that she's a very good listener

the feminine touch persists.

Regulation exfords take to the dance floor as gaily as, silver slippers when working hours end. There's also pride in wearing a uniform matching your date's.

Hark! Hark! The dogs do bark. Station life takes lots of footwork. The miles mount, walking from barracks to mess hall to office. Still, marching is popular.

TO HELP YOU SAFEGUARD YOUR WAR SECURITIES

You have made a patriotic investment in Victory Bonds : ... or War Lose Bonds . . . or War Savings Certificates . . . perhaps all three . . . to help your country in the war . . . and to help assure your after-war future.

To enable you to preserve your war securities from danger of loss by fire or theft, Canada's Chartered Banks offer a safekeeping service. Here are the details:

VICTORY BONDS and WAR LOAN BONDS-Take them to your bank ... to any branch of any chartered bank ... the bank will put them into safekeeping for you, will clip your coupons when the interest falls due, and will deposit the money to your name . . . If you haven't a bank account you can authorize the bank to open one for your convenience.

The total charge for this service and satisheeping is only 25 cents a year on bonds (no matter how many) up to \$250112 anadmik of one per cent on amounts over \$250;

WAR SAVINGS CERTIFICATES - You can lodge them also with your bent ... which will take them into safekeeping and for just one small charge cover the whole of the time (or any part of it) from purchase to maturity.

End of a German Dive Bomber

It's the same with the olonel, too...

To Private Willie Gillis, Jr., who hasn't issued a command (yet) and who is very good at peeling apples, the Home Town Newspaper is a welcome package, indeed.

Willie's Colonel, who hasn't peeled apples for a long time (if ever) and who is very good at issuing commands, comes from another town. But it's just as hard for him to get along without the news . . . espe-cially the news from home.

It's the same with the Captains and the Majors and the Generals. And with Ensigns and Admirals, too.

It's the same with people on the home front. With Bankers and Clerks, Clergymen and Machinists, Teachers and Students, Housewives and Business Women . . . and Workers in the War Plants.

It's the same with you and me.

No matter who we are or where we are or what we do, we all have one thing in common: we want the newspaper . . . because we want the news.

Tonay, when so much is happening so quickly, this constant hunger for the news, this universal need for the newspaper is stronger than ever.

We need newspapers today not only for the news' they bring, but for the guidance they give us; for the, advice, instruction and information . . . in the ads as well as the news columns . . . which help us adjust our lives to these critical and constantly changing days.

We need newspapers to be well-informed. And a nation that is well-informed is a more secure nation, a better prepared nation, a more democratic nation ... a nation more sure of progress and Victory.

BATTLE WAGGONS

Canadian ganies for mass production is now being applied with telling results to the output of motorined war equipment:

Production figures are already finitaric. Since the beginning of the war, Canada has produced and shipped to the battle-fields of the world more than 250,000 military vehicles. Production is now at the rate of one unit every three minutes and

Canadian fighting men need 160 different types of motorized equipment. Canada is producing all of them.

One plant slone is turning out in a single day enough Universal Carriers to equip two battalions. Heavy tanks, with 25,000 parts, are in mass production and, at one plant, are coming off the assembly line at the rate of one every few hours.

Fifteen hundred pounds of salvage rubber is worth while. But more and more will be found. Most of that collected this week was in the form of old tires and some other goods. But with the search earnestly pursued there will be found more and more rubber salvage in other articles.

articles.

A few facts will not be amiss. A medium tank is said to call for 1,760 pounds of rubber and the Flying Fortress for 1,246-pounds. A battleship requires seven and a high tion of rubber.

So the search for rubber must go no to take in not only old time sure of the fact in the fortress of the fact in the fact

MAKING JAM AND JELLY

RASPBERRIES are both plentiful and fine this year. So you should make more raspberry jam and jelly than usual to comnensate for the short strawberry crop. Make your raspberry jam and jelly with

CERTO. Here are a few instructions to help you in making the necessary purchases:

It is not obligatory to buy your fruit and

sugar at the same store.

2 Sugar ration coupons are not needed to purchase sugar for jam and jelly making. Just sign the youcher your grocer has for this purpose.

3 CERTO IS PECTIN, EXTRACTED FROM FRUIT. When pectin is used in making jam or jelly, the Wartime Prices and Trade Board Order No. 150 allows you to use sugar not in excess of one and one-quarter pounds of sugar for each pound of fruit. On the basis that "fruit" means "unprepared" fruit, this allows you to make upprepared result, this Certo way, which gives you approximately two-thirds more jam or jelly from the same amount of fruit.

RUTH: That can mean only one thing—you don't use Rinso! Try Rinso next washday and see the difference: Rinso doesn't merely get clothes white ::: it gets clothes the WHITEST everl

MOTHER: That's wonderful news! And just one look at your lovely print dress

MOTHER: How do you do it, Ruth? Jenny's dress makes my little girl's look dingy. And 'pon my word, I tried so hard to get it mowy. RUTH: Indeed, it is! And remember, Rinso floats away-dirt without hard rubbing or scrubbing. That's one reason why Rinso helps make clothes last longer.

MOTHER: What a big saving that is?

RUTH: It's also a saving to get the GIANT package of Rinso. Get Rinso at your store for next washday.

I'm new a walking citizen
Gince robber's getting short,
And se'ry day for many miles
Right gladly I cavort,
And the cars big and little
go dashing madly by,
I hall them with a touch of oride
And walk along in high.

The doctors all have told me
That walking gives me pep,
And so as much as possible,
Pm keeping right in step,
And up and down the theoretares,
In weatherfoul or fair,
You'll find me liking hard and fast
And breathing miles of sir.

And breating miles of air.

I see the neighbors' gardens,

I eatch the scent of flowers,

I watch the children at their play,

The birds in leafy bowers.

French Patriots Celebrate Day

It's the same with the olonel, too...

To PRIVATE WILLIE GILLIS, JR., who hasn't issued a command (yet) and who is very good at peeling apples, the Home Town Newspaper is a welcome package, indeed.

Willie's Colonel, who hasn't peeled apples for a long time (if ever) and who is very good at issuing commands, comes from another town. But it's just as hard for him to get along without the news . . . especially the news from home.

It's the same with the Captains and the Majors and the Generals. And with Ensigns and Admirals, too.

It's the same with people on the home front. With Bankers and Clerks, Clergymen and Machinists, Teachers and Students, Housewives and Business Women . , . and Workers in the War Plants.

It's the same with you and me.

No matter who we are or where we are or what we do, we all have one thing in common: we want the newspaper . . . because we want the news.

TODAY, when so much is happening so quickly, this constant hunger for the news, this universal need for the newspaper is stronger than ever.

We need newspapers today not only for the news they bring, but for the guidance they give us; for the advice, instruction and information . . . in the ads as well as the news columns . . . which help us adjust our lives to these critical and constantly changing days.

We need newspapers to be well-informed. And a nation that is well-informed is a more secure nation, a better prepared nation, a more democratic nation ... a nation more sure of progress and Victory.

Cancer Research

Scientific inquiry goes on relentlessly in the quest to find the secret of cancer, that diseases which occupies so much attention of mankind. New York Times remarks that "no one knows why normal cells should suddenly grow into ahapeless masses that take possession of the body. That a chemical disturbance can be one cause is now undefinable. These the half cause is now undeniable. Tar derivatives and dyes will star cancers. Upset the balance of the hormones, particularly the sex hormones, and cancer again results. Improper diets can upset the body's delicate chemical machinery and bring about the conditions favorable for wild

Unreliable tires can hold up production on a bomb or a bomber just as surely as a lack of raw materials. Workers must be "on time" tool

Today it is vitally important that those who work in war industries, make ture their tires are kept in top-notch going order ...; just as long as possible.

The way to be sure of getting oil the mileoge that the menufacturer built into your tires is by following certain simple driving rules faithfully and by providing for systematic, skilful tire service.

You can observe the driving rules your self. Regular tire care is another matter. Hit and miss methods won't do:

The Goodyser Tire-Life Extension Plan effers you wook-to-week service for a year, which provides, at low cost, for special tire conservation services by experienced litemen. No other plan of tire care can do as much for you.

Signing up for this plan, before tires are beyond saving, may mean the extra use of your car for months, perhaps a year, or even longer.

Thousands of motorists, who depend on their cars to take them to and from their work, are using the Goodyser Tru-Streenston Plan. Already accommodation is becoming limited. Make sure of your lines ...see your Goodyser dealer loday!

New Industry Springs From Need For Fine Instruments To Equip Warplanes

A pilot's life may depend on Kay Trowell's eye, for ahe is an inspector of finished aircraft instruments. The instruments-see Kay's eye like this. Inspiration?

From the turretz of Canada's Bolingtiroke hombers these Browning machine'guns promise sudden death to the enemy who crosses their sights. Turret assembly (right) shows pivoting seat-and-gun unit which gives gunner unlimited range.

Tilly Aboud's serious expression suggests the rivets will be well planted in this Hollingbroke fuselage. Born in Arabia, she bosses squad of 15 girl riveters.

Men and women work side by side producing wings for Harvard training planes. The woman installing wing flap mechanism is one of 4,500 in aviation industry.

The pretty eyes of Alma Lizotte, dedicated to Canada's industrial war effort, are well guarded from the steel turnings flying off this machine on which sale fashions parts for aircraft instruments. Safety, devices are compulsory.

Rolling off the assembly lines in an endless procession, these Bolingbrokes are constantly growing evidence of Canada's might in the air. For lighting pilots of the R.C.A.F. have is a graft produced, entirely by Canadian workers.

FIGHTING METALS

CANADIAN industry, factories, milh and shops, daily produce ever increasing quantities of ships, planes, ranks, mechanized transports and guas. But the continued production of these weapons depends on the shilty of Canada's mines and miners to keep the "fighting metala" coming.

The "fighting metals"-iron, copper, nickel, lead, zinc, and many rare metals—are not yielded up easily by mother earth. Most of them are buried deep; all require powerful explosives to free the ore.

For more than eighty years the Explosives Division of anadian Industries Limited has kept pace with the mining industry . ; ; continually improving explosives to increase production and reduce costs. Now, when Canada's "fighting metals" are needed more than ever, C-I-L commercial explosives give yeoman service to our mines and miners.
